

ADNAN HAIDER

MERN Stack Developer

Rawalpindi, Pakistan

+923338170525

 adnanhaider4878@gmail.com  <https://adnan-haider.vercel.app>  <https://github.com/AdnanMehr8>

PROFESSIONAL SUMMARY

Experienced **MERN Stack Web Developer** with a strong background in building full-stack applications from concept to deployment. Notably led the development of a **Batch Manufacturing Record (BMR) system** increasing the efficiency and reducing the errors by streamlining the manufacturing processes.. Proficient in **React.js**, **Node.js**, **Express.js**, and **MongoDB**, with additional expertise in **TypeScript**, **Prisma**, and **Next.js**. Skilled in API integration, CI/CD, and cloud deployment.

EDUCATION

Bachelor of Software Engineering

02/2020 to 02/2024

COMSATS University Islamabad, Wah Campus

EXPERIENCE

1) Web Developer

03/2025 to 05/2025

DANAS Pharmaceuticals – Rawalpindi, Pakistan

- Utilized **React.js** and **Bootstrap** to develop a user-friendly interface for the BMR system with smooth navigation and data visibility across different manufacturing stages.
- Applied **Node.js**, **Express.js**, and **MongoDB** for building scalable backend services that supported secure form submissions and real-time data validation.
- Implemented **role-based access control** and integrated user permissions to align with industry compliance.
- Ensured efficient team collaboration with **Git**, **GitHub**, and Agile workflows while providing support across IT systems including local deployments and server health checks.

2) MERN Stack Developer

06/2024 to 03/2025

Hi BPO LLC – Rawalpindi, Pakistan

- Engineered full-stack web applications with a focus on **performance optimization**, **scalability**, and **security**.
- Developed modular and reusable front-end components using **React.js**, integrated with **Redux** and **Context API**.
- Created robust backend APIs with **Express.js**, implemented **authentication with JWT**, and designed dynamic MongoDB schemas using **Mongoose**.
- Leveraged **CI/CD pipelines** and deployment platforms like **Vercel** and **Render** to streamline production workflows.
- Enhanced third-party integrations (e.g., payment gateways, analytics tools) and worked in **Agile teams**, participating in code reviews and sprint planning.

3) MERN Stack Developer Intern

02/2024 to 06/2024

Morosoft Solutions – Rawalpindi, Pakistan

- Gained hands-on experience building CRUD-based applications using the MERN Stack.
- Developed responsive UIs with **Tailwind CSS**, while learning component-driven development with **React.js** and **Redux Toolkit**.
- Practiced best practices for clean code, Git version control, and modular folder architecture.
- Constructed RESTful APIs and learned server-side logic with **Node.js/Express.js**, integrating with **MongoDB** for data persistence.
- Worked closely with mentors and received feedback on **UI/UX**, performance bottlenecks, and scalability techniques.

4) Full Stack Developer (Remote)

05/2025 to Present

Saynt AI – Remote (Contract)

- Contributed to the development of **IdeaSpring**, an AI-powered SaaS platform designed to help entrepreneurs validate, brand, and launch startups entirely through automated workflows.
- Built frontend modules in **Next.js 14** and **React 18** for guided user input, AI content generation, and brand kit customization using Tailwind CSS.
- Integrated backend services with **Node.js**, **Express**, **MongoDB**, and **Redis**, supporting modules like investor toolkits, legal documents, and community boards.
- Connected external AI services including **OpenAI (GPT-4)**, **Claude**, and **Stable Diffusion XL** for business intelligence, branding assets, and legal automation.
- Set up **GraphQL APIs**, Dockerized environments, and CI/CD pipelines on **AWS** with Cloudflare CDN for scalable, secure deployments.

- Participated in QA, load testing (10k+ users), and SOC 2-compliant security reviews.

PROJECTS

- **IdeaSpring – AI Startup Builder (Saynt AI)**

IdeaSpring is a full-featured AI startup builder platform that helps non-technical founders turn an idea into an investor-ready business. I worked on key modules like the business idea generator, SWOT analysis, logo & branding suite, AI website builder, and legal document automation. The system supports GPT-based financial forecasting, Claude-based legal workflows, and drag-and-drop customization for assets and pitch decks.

Stack: Next.js 14, React, Tailwind CSS, Node.js, Express, MongoDB, GraphQL, OpenAI, Claude, Stable Diffusion, AWS

- **EchoWrite – The Intelligent Content Repurposing & Generation Suite**

EchoWrite is an AI-powered platform designed to help content creators and marketers effortlessly repurpose their existing long-form content—like blog posts, video scripts, or podcast transcripts—into a variety of shorter, engaging formats suitable for different online channels such as social media, email, and more. It uses artificial intelligence to assist with tasks like generating summaries, adapting tone, suggesting headlines, and structuring text, aiming to save users time and maximize the reach of their original content.

Stack: React, Redux, Node.js, Express.js, MongoDB, Tailwind CSS

- **Batch Manufacturing Record (BMR) System**

A comprehensive system designed for pharmaceutical manufacturing processes with modular forms (Dispensing, Mixing, Compression, etc.), dynamic dashboard analytics, role-based permissions, and PDF report generation.

Stack: React, Redux, Node.js, Express.js, MongoDB, Bootstrap

- **Dripz – E-commerce Platform**

Fully featured e-commerce site with user authentication, product management, order handling, and an admin dashboard.

Stack: MERN Stack, Tailwind CSS, JWT

- **DropMart – A Dropshipping Platform**

Fully Functional dropshipping platform leveraging aliexpress openservice with proper product management and admin dashboard.

Stack: React, Redux Toolkit, Express.js, MongoDB

SKILLS

ReactJS, NodeJS, ExpressJS, MongoDB, NextJS, Bootstrap, Tailwind CSS, HTML/CSS/JS, Clerk, Prisma, Docker, Github workflows
